### **Author's response to reviews:**

Dear Drs. Ekkernkamp and Stengeldirk,

Thank-you for your additional improvements regarding our manuscript "A Decade of Experience with Injuries to the Gallbladder". We have added each of the newer data points (with SD and range where appropriate) to Table 1.

Thank-you so much again for your assistance with our manuscript. We look forward to working with you towards publication.

Sincerely,

Chad Ball, on behalf of all co-authors
